In selecting employees and collaborators, Group companies refrain from discriminatory behaviour, assessing candidates on the basis of criteria of merit, competence and professionalism, taking into account specific company needs.

Contracts with employees and collaborators are stipulated in compliance with the rules established by the regulations applicable from time to time and by the collective bargaining agreement in force.

In managing relations with employees and collaborators, the Group recognises and protects all the rights enjoyed by them, also in consideration of their position of subordination to management, organisational and hierarchical power.

Any employee, or collaborator in any capacity, who becomes aware of violations or attempted violations of this Code of Ethics shall report them to his/her superior.

Where reports prove to be unfounded and made in bad faith, the sanctions provided for in this Code of Ethics may be applied to the employee or collaborator responsible.

7.5. USE OF ASSETS, MEANS, CORPORATE RESOURCES AND PROTECTION OF CORPORATE ASSETS

Company assets consist of tangible physical assets (e.g. computers, printers, equipment, cars, buildings, infrastructures) and intangible assets (e.g. know-how, confidential information, names of strategic suppliers and customers, etc.).

The preservation of assets is a fundamental value for the safeguard of corporate interests.

Recipients, in the performance of their corporate activities, must protect the company's assets and prevent their fraudulent or improper use.

The use of corporate assets and information by the Addressees must be exclusively functional to the performance of corporate activities.

Employees and collaborators are required to use assets, means and resources made available to them in such a way as to protect their preservation and functionality.

In the use of goods, means and corporate resources, the Addressees are therefore bound to behave responsibly and in line with the operating procedures established to regulate their use.

Each employee and collaborator is responsible for the assets, means and resources entrusted to him/her and is required to promptly inform his/her supervisor about their improper use or use that

is harmful to the company's assets.

Over time, the Company has become aware of the importance of appreciating its products and services in order to cultivate its success and establish itself on the market.

Customers are, today, a fundamental asset for the Group. For this reason, all Addressees must pursue maximum customer satisfaction and provide, with efficiency and courtesy, high quality food products and complete and truthful information on their characteristics.

7.7. SUPPLIERS AND BUSINESS PARTNERS

Relations with suppliers and business partners are based on the search for the right efficiency in the supply, on loyalty in the relationship, on the recognition of the professionalism and competence of the interlocutor.

When selecting and establishing relations with suppliers, Group companies objectively and comprehensively assess the cost-effectiveness, technical and economic capabilities and overall reliability of their interlocutors.

In particular, the Companies take into account elements such as financial solidity, skills, professionalism, design resources, know-how and the adoption of appropriate quality control systems.

Core suppliers, business partners or external collaborators are informed of the existence of the Code of Ethics and of the relevant commitments and, to this end, individual contracts include special clauses requiring or regulating compliance with it.

Furthermore, the Group does not use child labour and does not enter into contracts with suppliers or other collaborators who do so, guaranteeing that its products are not manufactured by people who are denied the opportunity to receive an education and live a life appropriate to the rights of the child.

7.8. PUBLIC ADMINISTRATION

Relations between the Company and Public Institutions and Administrations are based on the principles of fairness, transparency and cooperation. Any type of behaviour that could be construed as collusive or likely to undermine the principles expressed in this Code is rejected.

The assumption of commitments with Institutions and Public Administrations is reserved to the Directors, according to the delegations conferred, unless special powers of attorney are conferred to other internal resources.

The Group rejects any behaviour that could be interpreted as a promise or offer of payments, goods or other benefits of any kind in order to promote and favour its interests and take advantage of them.

The Company is committed to avoid any form of gift to public officials or persons in charge of a public service, of any kind, whether Italian or foreign, or to their relatives, even through an intermediary, such as to influence the independence of judgement or induce them to ensure any advantage for themselves. This commitment does not allow for exceptions even in those countries where offering valuable gifts to business partners is considered customary. Gifts or gratuities are permitted only if they are of modest value and, in any case, if they cannot be interpreted in any way as a means of receiving illegitimate favours, and always in compliance with the internal procedures laid down for this purpose.

Any employee who directly or indirectly receives proposals for benefits from public officials, public service appointees or employees in general of Public Institutions and Administrations which might constitute such a case, must immediately report it to OdV, or to the contact person, if a third party.

When any business negotiation, request or relationship with the Public Administration is in progress, the personnel in charge must not try to improperly influence the decisions of the counterparty, including those of the officials who negotiate or take decisions on behalf of the Institutions and Public Administrations.

In the specific case of conducting a tender with Institutions and Public Administrations, one must act in accordance with the law and proper business practice.

In the event of the use of a consultant or a "third party" representing the Companies in relations with Institutions and Public Administrations, the same guidelines apply to the consultant and his staff or to the "third party" as to the Company's employees.

Moreover, the Companies shall not be represented in relations with Institutions and Public Administrations by a consultant or a "third party" when conflicts of interest may arise.

In the course of a business negotiation, request or commercial relationship with Institutions and Public Administrations, the following actions shall not be undertaken (directly or indirectly)

- examining or proposing employment and/or business opportunities that may benefit employees of Institutions and Public Administrations in a personal capacity;
- solicit or obtain confidential information that may compromise the integrity or reputation of either party; or
- deny, conceal or delay any information requested by such authorities and other regulatory bodies in their inspection functions.

7.9. PUBLIC SUPERVISORY AUTHORITIES AND CONTROL BODIES

The Companies undertake to scrupulously observe the rules dictated by the Supervisory Authorities in order to guarantee compliance with the regulations in force in the sectors connected with their activity (for example, the Competition and Market Authority, the Authority for the Protection of Personal Data, Ministry of Economic Development, etc.).

The Addressees undertake to comply with any request from the regulatory bodies in their inspection functions and to provide their full cooperation during the preliminary investigation procedures.

In communications with State or international institutions, public supervisory authorities or control bodies aimed at explaining the Group's activity, responding to requests or acts of inspection (questions, interpellations, requests for information related to professional appointments in progress or concluded, etc.), or in any case at making known the position of the Companies on relevant issues,

each Group Company is committed to

- adopt an attitude of maximum helpfulness and cooperation and not knowingly hinder in any way the functions carried out by the above-mentioned subjects;
- operate, without any kind of discrimination, through the communication channels appointed for this purpose with the institutional interlocutors at national and international, community and territorial level;
- represent its interests and positions in a transparent, rigorous and consistent manner, avoiding collusive attitudes;
- avoid falsification and/or alteration of data, statements, reports in order to obtain an undue advantage or any other benefit for the Company.

7.10. EXTERNAL COMMUNICATIONS

External communications must be clear and based on the principles of truthfulness and transparency of information. Under no circumstances shall Addressees divulge false or tendentious news or comments concerning company activities or the results of professional activities, as well as relations with third parties in general.

Relations with the mass media are reserved exclusively to the corporate functions delegated for that purpose.

In particular, in the conviction that business activities and results must be strictly linked to a responsible business conduct, the external communication, including that aimed at spreading the brand and/or image, of the Companies shall

- be accurate and consistent with the Principles and policies of the Companies;
- comply with laws, rules, practices of professional conduct;
- be carried out with clarity and transparency: independent from any form of conditioning, both internal and external.

It is forbidden to disclose false, incomplete and misleading information.

7.11. CONTRIBUTIONS TO CHARITIES AND ONLUS, DONATIONS AND SPONSORSHIPS

The sponsorship and patronage activities promoted by the Group may concern sports events, shows, restoration of artistic and archaeological heritage, cultural events and initiatives linked to social, humanitarian and environmental issues.

In any case, when stipulating sponsorship or patronage contracts, the Companies of the Group shall maintain a correct and transparent conduct, avoiding any pressure on the subjects concerned.

The Group condemns the improper use of donations as a tool to obtain favours and concessions from the beneficiary and is committed to ensuring the achievement of social and public interest purposes.

7.12. ENVIRONMENTAL PROTECTION

The environment is a primary asset of the community that the Group wants to contribute to

safeguard. To this end, it plans its activities by seeking a balance between economic initiatives and environmental needs, in compliance with applicable laws and regulations. The Euricom Group is therefore committed to improving the environmental and landscape impact of its activities by taking into account the development of scientific research and best practices.

As part of its activities, the Group supports the rational and sustainable use of energy through the production of clean energy using husk, a by-product of paddy rice processing. The Group's environmental policy is supported by the awareness that the environment can represent a major competitive advantage in a constantly expanding market that is increasingly attentive to factors such as quality and behaviour.

8. VIOLATIONS OF THE CODE OF ETHICS AND RESULTING SANCTIONS

8.1. COMPLIANCE WITH THE CODE, VIOLATIONS AND SANCTIONS

The rules of conduct defined in the Code constitute a basic reference to which the Addressees must comply in their relations with their interlocutors. In fact, the Company considers the Code as an instrument of guarantee and reliability, to protect the assets and reputation of the entire Group and recognises the legal relevance and mandatory effectiveness of the principles and rules of conduct established by the Code itself.

In addition, the Company makes all those who, for various reasons, have dealings with the Euricom Group responsible for compliance with these principles, and prepares a specific system of sanctions to ensure the effectiveness and efficacy of the Code, and undertakes to apply it indiscriminately to all categories of recipients.

Compliance with the rules of the Code of Ethics must be considered an essential part of the contractual obligations of employees pursuant to and for the purposes of the applicable legislation. Violations of the rules of the Code of Ethics may constitute a breach of the primary obligations of the employment relationship or a disciplinary offence, with all the consequences of the law, including with regard to the preservation of the employment relationship, and may lead to the payment of compensation for damages resulting from the same.

The Company undertakes to provide for and impose, with consistency, impartiality and uniformity, sanctions proportionate to the respective breaches of the Code and in accordance with the provisions in force on the regulation of labour relations.

For individuals who hold positions of representation, administration or management within the Euricom Group, violation of the rules of the Code will result in the competent corporate entity taking the most appropriate sanctioning measures in relation to the nature and seriousness of the violation committed and the status of the individual who committed the violation, in accordance with applicable law.

For all other Recipients with whom the Company has contractual relations, since compliance with the Code is a prerequisite for the continuation of the professional/collaborative relationship existing with the Company, the violation of the rules of the Code may constitute a breach of contractual obligations, with all legal consequences, including the termination of the contract and/or assignment, and may lead to the payment of damages by the Company or the Companies of the Euricom Group. The Company will not establish business relationships with anyone who does not agree with or refuses to comply with the principles of the Code.

8.2. REPORTING

Employees of the Group may ask for clarification on the meaning and application of the Code, in general, from the Chief Executive Officer, who is also responsible for its dissemination and integration into the Company's decision-making processes of the ethical criteria adopted towards the various company stakeholders. In carrying out his activities, the Managing Director may avail himself of the operational support of the competent Group functions.

If Group employees become aware of alleged violations of this Code of Ethics or of conduct that does not comply with the rules of conduct adopted by the Company, they must promptly report them through the following alternative channels

- e-mail: odv@euricom.it

- a letter, addressed to the attention of the OdV, to the following address:

Euricom S.p.A.
Valle Lomellina (PV)
Via Stazione 119
CAP 27020

Reports or complaints may also be made anonymously, unless prohibited by local legislation.

The Company considers reports made in good faith as a gesture of loyalty to the Company and ensures the confidentiality of the reporter's identity, without prejudice to legal obligations. The Company will not tolerate acts of retaliation against anyone who, in good faith, raises an issue concerning a possible violation of the Code as a result of a report or participation in an investigation, and will appropriately sanction the perpetrators.
